# Introduction

---

Article 29 of the Tax Law authorizes counties, cities and some school districts to impose a local sales tax as a complement to the statewide tax. This report presents statistical information on taxable sales and purchases subject to the county and New York City (NYC) sales tax. Taxable sales include nearly all retail sales of tangible personal property and certain services. Taxable purchases represent the value of tangible personal property or services purchased for use in business operations (which would otherwise be subject to tax) on which no sales tax was previously paid.

This report presents county taxable sales and purchases subject to the county sales tax. For the most part, the tangible property and services that are taxed by counties are also taxed by New York State. This data is reported in separate statistical tables as the state tax base in order to provide a more accurate measure of the State's taxable sales and a more consistent comparison of the taxable sales trends of counties. However, counties also tax some tangible property and services that are exempt from the state sales tax such as residential energy sales and local clothing taxable sales. The taxation of these items varies by county. The taxable sales of these items are presented in a separate table of the local tax base. During the reporting period, the following items are exempt from the state sales tax, and are in the local sales tax base for certain counties:

- Clothing and footwear costing less than \$110;
- Consumer utility and fuel taxes for residential energy;
- Fuel and utility services and farming services (New York City only);
- Other NYC services (parking services, hotel room occupancy services, cleaning and maintenance services, credit rating and reporting services, miscellaneous personal services, protective and detective services, interior decorating and design services);
- Sales to a Qualified Empire Zone Enterprise (QEZE) eligible for exemption; and
- Consumer's utility tax for telephone services, telephone answering services, and telegraph services.

---

Unless separately stated, the statistical tables and figures in this publication are based on both the state and local tax bases.

Data presented herein are derived from vendor and purchaser information reported on New York State sales tax returns. The report displays the data for all counties combined statewide, New York City, all counties outside the City, and each county separately. This publication presents (1) five year annual trends, (2) state and local tax base trends by industry for the two most recent annual selling periods, and (3) county trends by region. Data for the March 2001 through February 2002 selling period are revised from the last report. Data for the March 2002 through February 2003 selling period are preliminary and will be revised in our next report.

On March 1, 2000, the State's permanent sales and use tax exemption on clothing items and footwear costing less than \$110 went into effect. This exemption does not apply to any locally imposed sales and use taxes unless the county or city imposing those taxes elected to provide for it. As of March 1, 2002, sixteen counties and New York City had elected to exempt locally imposed sales and use taxes. Appendix D shows the counties that elected to exempt the locally imposed sales and use taxes and the rates imposed by those counties not electing to exempt local sales tax.

On May 15, 2000, Chapter 63 of the Laws of 2000 was enacted. This legislation amended the Tax Law to provide certain tax benefits under the new "Empire Zones Program Act" which is applicable to the New York State and local sales and compensating use taxes, as well as to certain other taxes. Beginning March 1, 2001, certain purchases and uses of tangible personal property and services by a Qualified Empire Zone Enterprise (QEZE) are exempt from the New York State four percent sales and use tax. These exemptions do not apply to any locally imposed sales and use taxes unless the county, city, or school district imposing those taxes elects to provide the exemptions.

## Annual Sales and Purchases

Table 1 summarizes annual sales and purchases subject to use tax for the state and local tax base for all New York counties during the past five years. With the exception of the March 2001-February 2002 selling period, annual sales have grown each year when compared with sales reported for the previous year. Preliminary data for March 2002 through February 2003 indicate that reported sales increased by \$5.1 billion to \$219.6 billion, which is a 2.4 percent increase from the previous year.

**Table 1: Statewide Combined Annual State and Local Tax Base Totals**

(In Thousands)

Period	Taxable Sales & Purchases	Change from Previous Period	
		Amount	Percent
3/98 - 2/99	\$189,655,494	\$7,681,069	4.42
3/99 - 2/00	207,152,430	17,496,936	9.23
3/00 - 2/01	217,750,656	10,598,226	5.12
3/01 - 2/02**	214,511,354	(3,239,302)	(1.49)
3/02 - 2/03*	219,648,817	5,137,463	2.39

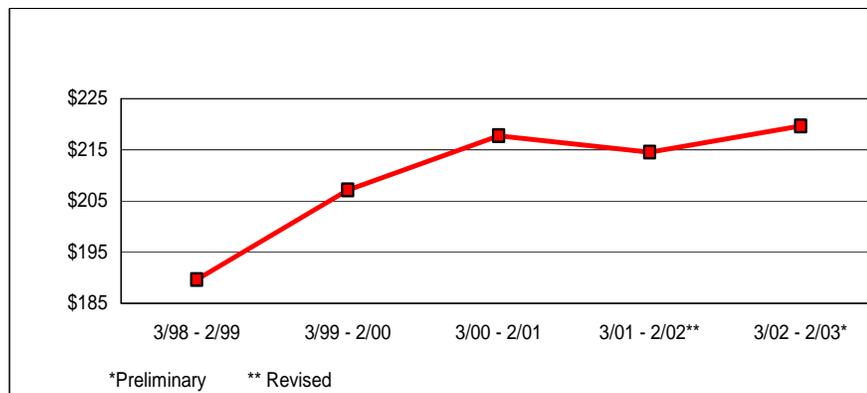

\* Preliminary

\*\* Revised

Figure 1 depicts that the March 2002-February 2003 selling period resumed the upward trend of annual sales that had occurred during the March 1998 through February 2001 selling periods. The decrease in taxable sales and purchases in the March 2001-February 2002 selling period was directly related to the impact of the national recession, the decline in financial markets and the World Trade Center disaster. Even with this one-year decline, annual sales have increased 15.8 percent from the March 1998-February 2003 reporting periods.

**Figure 1: Statewide Five-Year Trend**

(In Billions)

---

## Industry Analysis

Table 2 provides a look at statewide annual total taxable sales and purchases by industry for the state tax base. Taxable sales and purchases for the March 2002 through February 2003 annual selling period reached \$201 billion. This amount exceeded the total reported for the previous year's comparable twelve-month selling period by 1.7 percent (\$3.5 billion).

Statewide, six of the major industries realized year-over-year growth for the latest annual selling period. There were no significant increases, but modest increases were noted in the retail trade (3.6 percent), information (0.1 percent), administrative/support services (0.5 percent), health care (3.5 percent), accommodation and food services (3.2 percent), and other services (2.7 percent) industries. The largest decreases in industry sales occurred in the manufacturing (-4.5 percent) and the professional, scientific, and technical (-9.7 percent) industries.

Retail sales accounted for 48.2 percent of the taxable sales and purchases in the state tax base, contributing \$96.8 billion to the statewide total. During this most recent selling period, retail sales rose 3.6 percent from the previous year. Gains were realized in all sectors of the retail trade industry with the exception of sporting goods, hobby, book and music stores (- 0.9 percent). Percentage growth for the remaining sectors ranged from 1.0 percent in the food and beverage sector to 6.4 percent in the nonstore retail sector.

**Figure 2: Statewide Industry Shares for the State Tax Base in the 3/02-2/03 Selling Period**

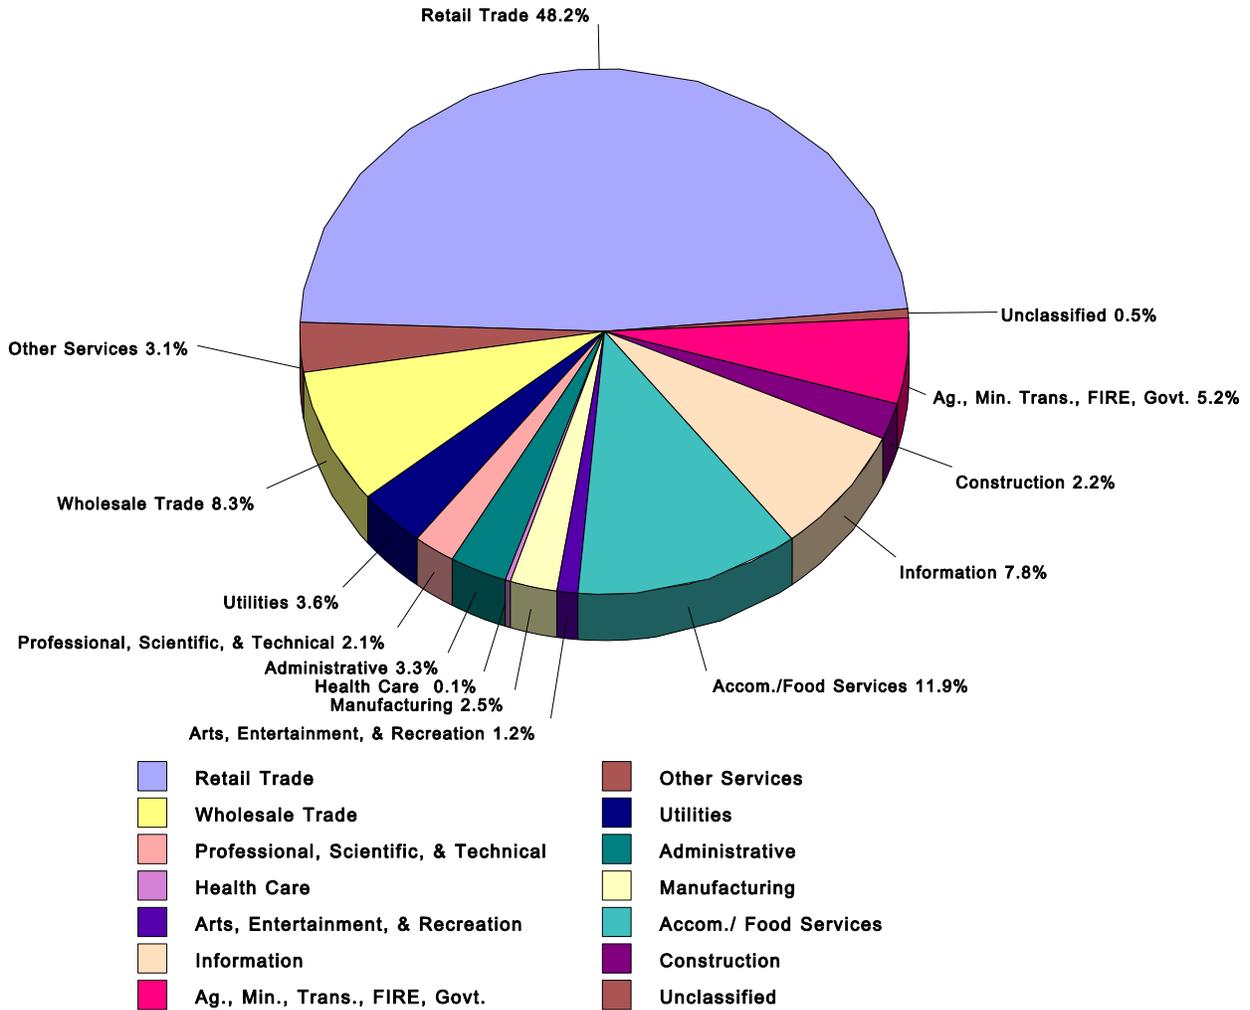

Figure 2 shows the statewide share of taxable sales and purchases contributed by major industry for the state tax base in the latest selling period. Retail trade and accommodation and food services continue to be the two largest sources of State taxable sales and purchases. Combined, they contribute 60.1 percent of the State total.

Table 3 provides a look at the statewide annual industry totals for the local tax base portion of taxable sales and purchases. These are taxes imposed only at the county or New York City level and are exempt from state tax. Taxable sales and purchases for the March 2002 through February 2003 selling period increased by 9.9 percent over the previous reporting period. Taxable sales and purchases reported from the 1.5 percent sales tax on residential energy, coupled with the taxable sales and purchases realized by the clothing sector, contributed 89.1 percent to the statewide local tax base.

**Table 3: Statewide Annual  
Local Tax Base Industry Totals**  
(In Thousands)

Industry	Selling Period		Percent Change
	3/01 - 2/02 **	3/02 - 2/03 *

## County Trends by Region

All, but seven, of the State's counties showed year-over-year gains in taxable sales and purchases. Figure 3 provides a glimpse of county sales activity trends by region. As shown, year-over-year gains were widely dispersed throughout the State.

Table 4 indicates that two counties surpassed ten percent growth in total taxable sales and purchases for the March 2002 through February 2003 period as compared with the previous year. Putnam County (10.4 percent) experienced the most growth in taxable sales and purchases, followed by Saratoga County (10.2 percent).

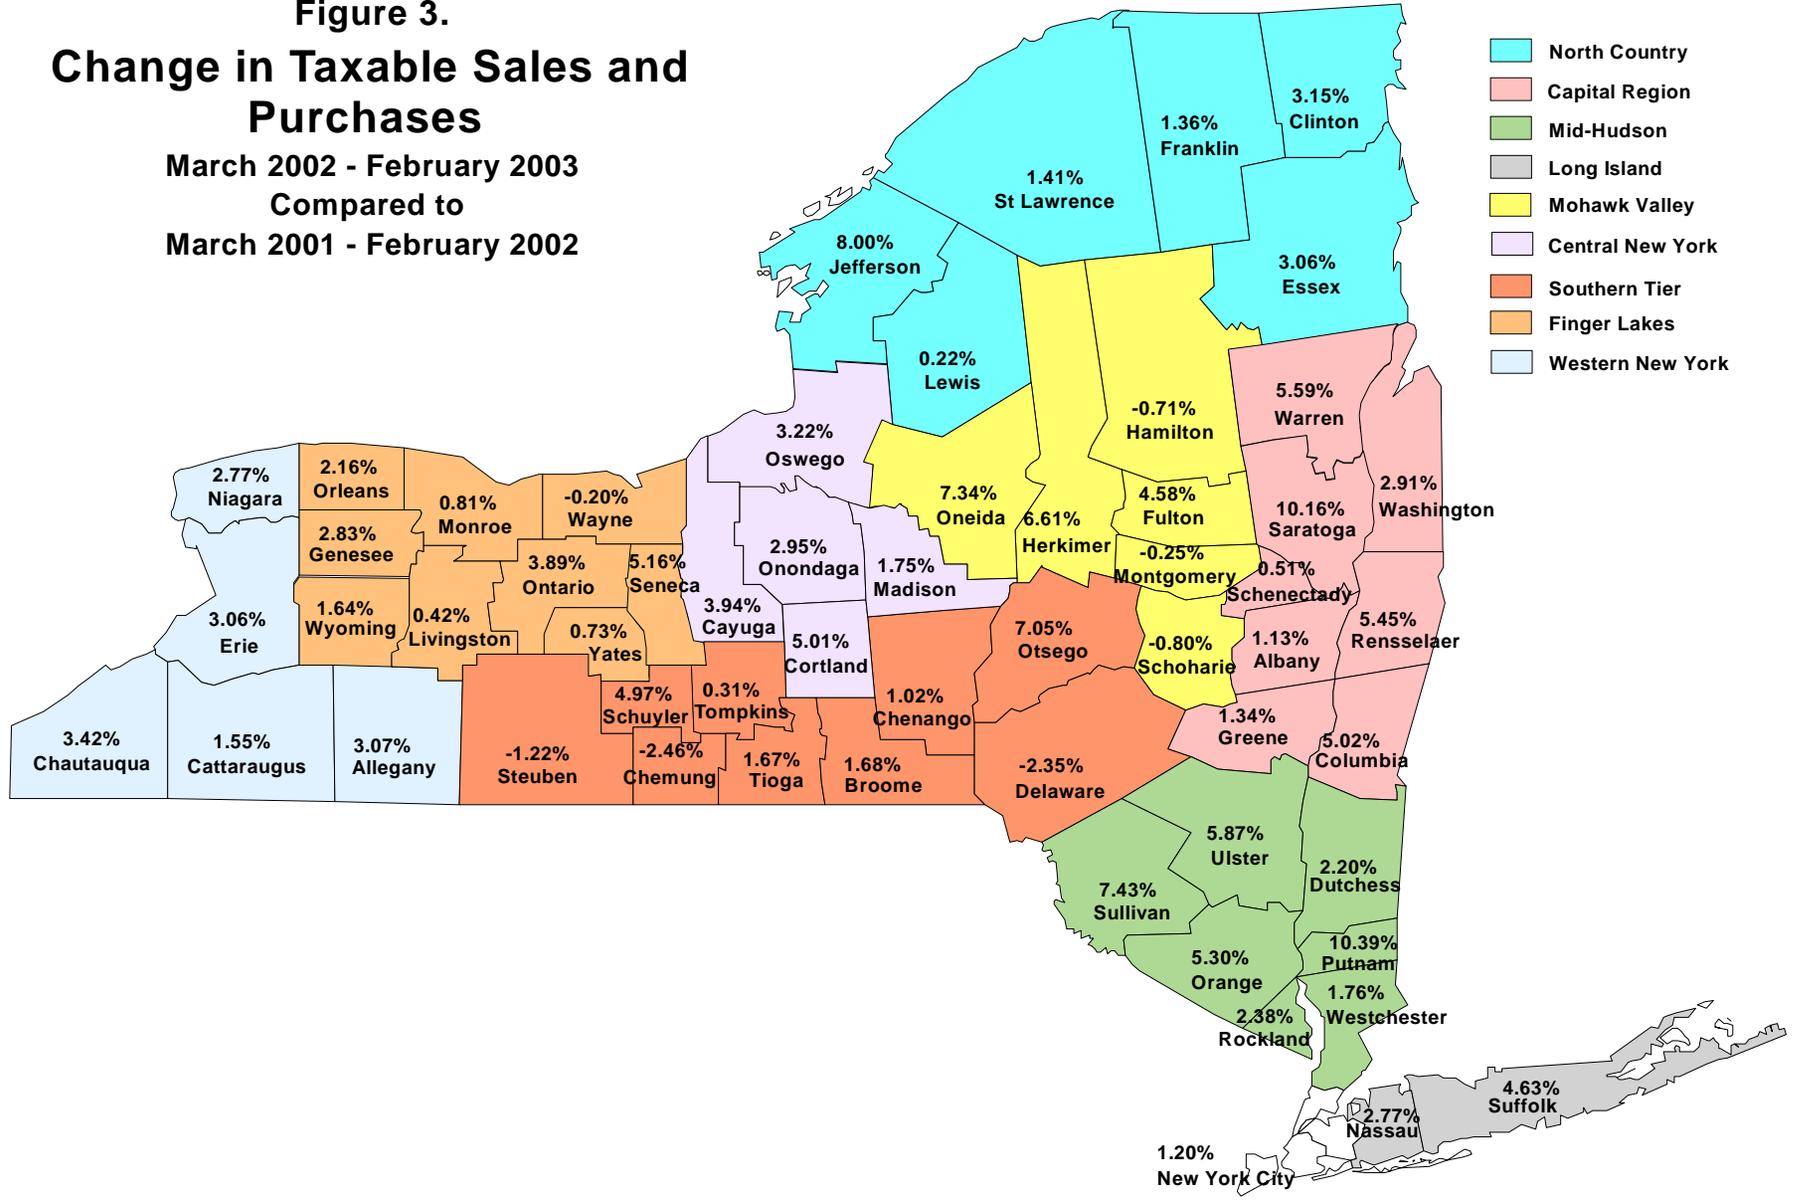

Increases in the information (25.8 percent) and retail trade (11.8 percent) industries were responsible for 89.6 percent of Putnam County's reported \$82.9 million gain in taxable sales and purchases. While an increase in the taxable sales of wireless telecommunication carriers was the stimulus for the increase noted in the information sector, growth in retail sales was the real impetus for Putnam County's realized gains in taxable sales and purchases. In retail trade, gains were reported in all sectors with the exception of general merchandise (-15.0 percent) and miscellaneous retail (-2.9 percent). Much of the gain in retail trade was due to increased building materials and garden equipment sales brought about by the opening of a new retail home center.

Saratoga County was the only county to realize gains in all of its major industry groups, with the most notable percentage increases reported for the arts, entertainment, and recreation (18.7 percent), information (15.7 percent), and health care (14.5 percent) industries. A significant gain in the retail trade (10.2 percent) industry was responsible for 61.2 percent of the total state tax base industry year-over-year growth. Much of the growth in the retail trade industry can be attributed to increases in the sales of motor vehicles and general merchandise, as well as an increase in gasoline sales.

Chemung (-2.5 percent) and Delaware (-2.3 percent) counties experienced the most significant declines of the seven counties reporting year-over-year drops. An \$18.8 million decrease in the retail trade industry coupled with declines in the utilities (-15.7 percent), manufacturing (-15.3 percent) and wholesale trade (-7.6 percent) industries appear to have explained the decline in Chemung County's taxable sales and purchases. Delaware County's decline appears to be mainly attributable to an \$11.7 million decrease in taxable sales and purchases in the retail trade industry, of which 98.5 percent of that decrease was reported in the motor vehicles and parts sector.

## New York City

The five New York City counties of the Bronx, Kings, New York (Manhattan), Queens and Richmond represent 37.3 percent of all reportable statewide taxable sales and purchases for the latest annual period. With the exception of the March 2001-February 2002 annual selling period, New York City sales had expanded continually since the mid 1990's. Reported taxable sales and purchases for 2002-2003, although modest compared to past years, increased by 1.2 percent to \$81.8 billion (Table 5 and Figure 4). This increase is indicative of the economic recovery that began to take effect following the World Trade Center disaster.

**Table 5: New York City Combined Annual State and Local Tax Base Totals**

(In Thousands)

Period	Taxable Sales & Purchases	Change from Previous Period

**Figure 4: Five Year Trend for New York City**

(In Billions)

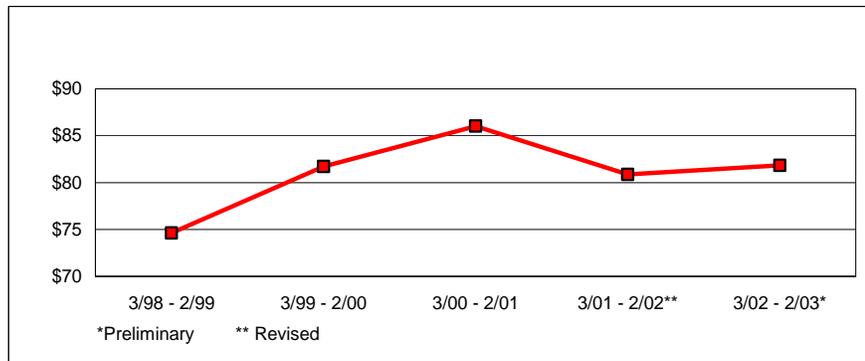

Table 6 summarizes New York City's annual total taxable sales and purchases by industry for the state tax base. For the most recent selling period ending February 2003, sales tax vendors reported \$75.4 billion in New York City taxable sales and purchases, a decrease of \$124.5 million or 0.2 percent from the same period one year earlier.

\* Preliminary

\*\*Revised

For both the State and City, retail sales provide the largest share of taxable sales and purchases among the major industry sectors in the state tax base. For the most recent selling period, retail sales represent 48.2 percent of all taxable sales statewide, in contrast with 34.8 percent within the City. This disparity reflects the greater importance of taxable services in the state sales tax base in New York City.

In New York City, five industries posted a percentage increase from the previous reporting period. The largest increase, in the accommodation and food services industry (3.6 percent), appears to be indicative of the initial rebounding of the tourism trade which was detrimentally affected in the March 2001-February 2002 reporting period by the World Trade Center disaster. Other noteworthy increases occurred in the other services (3.1 percent), retail trade (2.5 percent), administrative/support services (2.1 percent), and the health care (0.7 percent) industries. Substantial declines were still evident in the professional, scientific, and technical (-10.5 percent), manufacturing (-9.1 percent) and the utilities (-8.8 percent) industries. Much of this reported drop in taxable sales and purchases can still be attributed to the direct impact of the World Trade Center disaster on New York City's economy.

Table 7 summarizes the local tax base component of New York City's taxable sales and purchases. New York City reports taxable sales for two industries not taxed by New York State or any county outside New York City. The first industry includes: 1) fuel and utility services used in the production of gas, electricity, refrigeration, and steam and 2) installation, repair, and maintenance services for property used in farming. The second industry sector includes parking services, hotel room occupancy services, and miscellaneous services (cleaning and maintenance services, credit rating and reporting services, and interior decorating and design services).

**Table 7: New York City Annual Local Tax Base Industry Totals**  
(In Thousands)

Industry	Selling Period		Percent Change
	3/01 - 2/02 **	3/02 - 2/03 *

\* Preliminary

\*\* Revised

1/ Includes parking services, hotel room occupancy services, cleaning and maintenance services, credit rating and reporting services miscellaneous personal services, protective and detective services, interior decorating and design services.

Taxable sales and purchases reported from the 1.5 percent sales tax on residential energy comprise 71.7 percent of New York City's local tax base. Taxable sales for residential energy rose by 26.4 percent during the year.

New York City elected to exempt locally imposed sales and use tax on clothing when the State implemented the permanent sales and use tax clothing exemption on March 1, 2000. This sales and use tax exemption applied to clothing items and footwear costing less than \$110.

## Counties Outside New York City

Preliminary data indicates that taxable sales and purchases in counties outside New York City reached \$137.8 billion for the year ending February 2003 (Table 8). This value represents a 3.1 percent increase from the previous year and a 19.8 percent increase from sales reported four years ago. Figure 5 shows that taxable sales and purchases reported outside of New York City continued to grow during the last annual selling period.

**Figure 5: Five-Year Trend for Counties Outside of New York City**  
(In Billions)

Analysis of the state tax base industry data presented in Table 9 reveals that the health care industry reported the largest percentage gain (5.1 percent) of any major industry from the same period in the previous year. The next largest gains were reported by the retail trade industry (4.1 percent) and the utilities industry (3.2 percent). Within retail trade, sales from the gasoline stations sector saw the most significant gain (6.4 percent). The only industry to report a significant decline was the professional, scientific, and technical industry (-8.0 percent).

Table 10 provides a look at the annual industry totals for the local tax base portion of taxable sales and purchases for counties outside of New York City. Taxable sales and purchases for the March 2002 through February 2003 selling period increased by 5.1 percent, primarily due to an 8.3 percent increase in local taxable sales on residential energy and a 2.5 percent increase on clothing taxable sales. Taxable sales and purchases from the 1.5 percent sales tax on residential energy together with the local sales tax collected on clothing sales contributed 98.2 percent to the local tax base for all counties outside of New York City.

## Methodology and Data Limitations

The taxable sales and purchases statistics presented in this report come from more than three million data items reported on about 250,000 sales tax returns filed each quarter with the New York State Department of Taxation and Finance. Most of the 300,000 annual returns are filed following the year-ending sales tax quarter that closes on February 28. The report aggregates quarterly data into annual periods to dampen fluctuations caused by vendor late reporting, account reconciliation of prior period activities and amended returns.

This report provides a snapshot of a continuously changing sales tax file. File records are updated daily to reflect late and amended returns and corrected return information. A recent analysis of data corrections to the sales tax file indicates that a minimum time period of two years is necessary to generate the data to produce this report. During this period, vendors file their sales tax returns, including amended and late-filed returns. As the returns are filed, the Department has the tax return data entered onto data files, obtains any missing data, checks for data inconsistencies, corrects the data errors and processes the tax payments with the returns. Only after the Department completes this process, will the file records be ready to serve as the data base for preparing this report.

---

The data in this publication supersedes information included in earlier reports. Although this report includes information for a 12-month period and annual percent changes are computed, special care should be taken when using these percent changes. As noted above, sales tax data are subject to continual review. A significant part of these revisions relate to vendor over- and under- reporting.

This report generally classifies taxable sales and purchases within industrial sectors based on the vendor-reported industry or the industry code identified on the vendor registration form. These codes, from the North American Industry Classification System (NAICS), are listed with their corresponding numerical ranges in Appendix A.

Classification problems arise when vendors inadvertently misclassify or fail to identify their primary business activity. For example, a wholesaler who also conducts retail sales may not understand to classify the primary business as wholesale trade. Misclassification problems are nearly impossible to remedy. The Office of Tax Policy Analysis has been able to classify some vendors who did not classify themselves. After this effort, less than two percent of the taxable sales and purchases of vendors remain unclassified.

Some counties tax both residential and nonresidential energy sales. However, New York State and a number of counties that are listed in Appendix B do not tax residential energy sales. In an effort to present a more accurate representation of the State's taxable sales and purchases base for each county, residential energy sales, local clothing taxable sales, and any other local-based taxable sales and purchases that are exempt from state tax are no longer combined with the state taxable sales and purchases base. Instead, they are presented in a separate table for the local tax base.

Appendix C shows combined State and local sales tax rates in each county and identifies changes that occurred during the most recent reporting period. These data are presented for informational purposes.

Appendix D identifies the counties that elected to exempt the locally imposed sales and use taxes on clothing and footwear. It also provides the rates imposed by those counties not electing to exempt this local sales tax.

Data users are cautioned that industry taxable sales may represent only a portion of industry gross sales. Moreover, the percent of sales that are taxable can vary from period to period. As such, taxable sales may not directly reflect the correct level or trend of aggregate economic activity for the industry.

# Appendix A: North American Industry Classification System Code Ranges By Industry

---

The industry codes displayed in this report correspond to the North American Industry Classification System (NAICS) codes published by the U.S. Office of Management and Budget. Sales tax vendors are asked to identify their primary business function and identify themselves using NAICS codes. This process is voluntary and subject to the tax preparer's understanding of the classification codes.

## North American Industry Classification System Code Ranges

Industry	2 Digit NAICS Code	3 - 6 Digit NAICS Code Range
Utilities	22	221-22133
Construction	23	233-23599 <sup>1</sup> , 236-23899 <sup>2</sup>
Manufacturing	31-33	311-339999
Wholesale Trade	42	421-42999 <sup>1</sup> , 423-42512 <sup>2</sup>
Retail Trade	44-45	
Motor Vehicles and Parts		441-44132
Furniture and Home Furnishings		442-442299
Electronics and Appliances		443-44313
Building Materials		444-44422
Food and Beverage		445-44531
Health and Personal Care		446-446199
Gasoline Stations		447-44719
Clothing		448-44832
Sporting Goods, Hobby, Book and Music Stores		451-45122
General Merchandise		452-45299
Miscellaneous Retail		453-453998
Nonstore Retail		454-45439
Information	51	511-51919
Professional, Scientific, and Technical	54	541-54199
